Winter Wheat

biottrinsic™ W13

INDIGO'S BIOLOGICAL SEED TREATMENT Plant for Performance and Grow with Confidence

biottrinsic™ W13 is a beneficial microbe applied to the seed to help improve plant growth, tillering, and plant productivity.

FEATURES AND BENEFITS

- Can be used with a broad range of chemistries
- Supports plant development throughout the season
- Helps maximize yield potential throughout development
- Broad geographic footprint supporting both Hard Red Wheat and Soft Red Wheat
- Increases water absorbed by the roots
- Increases root growth in both optimal and water stressed conditions

Hard Red Winter Wheat Performance	4%	3^{BU/AC}
	Yield Uplift	Yield Uplift

Formula	Pkg Treats	Pkgs/ Case	Case	Case Treats	Unit Measures
FP	200 units	1	Pail	200 units	50 lbs
WD	200 units	1	1x200	200 units	50 lbs

Soft Red Winter Wheat Performance	3%	2^{BU/AC}
	Yield Uplift	Yield Uplift

Application Rate:
FP: 1 vol. Oz/cwt, WD: 1 fl. Oz/cwt

*Product performance information based on third-party field trials. Results will vary across growers and farm operations. A number of variables may affect agronomic outcomes. Indigo does not make any representations, warranties or guarantees as to any specific results or outcomes. Product may not be available in all areas. Limitations, terms, and conditions apply.

Winter Wheat

biotrinsic™ W13

THE SCIENCE BEHIND THE DIFFERENCE

Microbiomes, or communities of microbes, help maintain internal processes for all living things – Indigo focuses on identifying microbes that have evolved in conjunction with plants over time to optimize their health and maximize their productivity.

At Indigo, we identify which of these microbes are most beneficial to a plant's health through the application of algorithms and machine learning. We further prove their performance at our research laboratories and greenhouses in Boston, Massachusetts and Research Triangle Park, North Carolina along with extensive field trials throughout the United States. Our resulting seed treatment products complement a plant's natural process to improve health and development across each phase of life, while boosting crop yields.

WHAT MAKES BIOTRINSIC™ DIFFERENT

More Beneficial for Your Crop

Microbes are selected to address the key stresses that limit crop yield potential. This allows you to select the right biotrinsic™ products based on the stresses that have the greatest impact on your farm.

From Plants for Plants

biotrinsic™ is a collection of over 30,000 all naturally occurring microbes that have been extracted from plants thriving in stressful conditions. We isolate microbes that are abundant in plants that are thriving under stress while other plants around them are not. This allows us to tailor our products to a specific crop and set of stresses.

**Product performance information based on third-party field trials. Results will vary across growers and farm operations. A number of variables may affect agronomic outcomes. Indigo does not make any representations, warranties or guarantees as to any specific results or outcomes. Product may not be available in all areas. Limitations, terms, and conditions apply.*
