Cover Crops  
**biottrinsic™ M36**

**Plant for Performance and Grow with Confidence.**

**SATISFACTION  
GUARANTEE**  
100% with replant policy.

**Product Benefits**

Improves:

- » Biomass potential
- » Root growth potential
- » Nutrient use efficiency

*Average of 8 trials and 430 acres*

**Higher biomass cover crops mean more...**

- Soil water-holding capacity
- Nutrient availability
- Water infiltration and field accessibility
- Compaction-busting roots
- Photosynthetic activity
- Compaction-busting roots

**How it works**

Improves nutrient conditions for root and plant growth by increasing bioavailability of phosphorous and potassium into plant accessible forms in soil, resulting in:

- » Improved root area
- » Improved shoot weight
- » Improved root to shoot ratio

Untreated  
No Stress

A wide range of variables affect product performance, your results may vary. Product may not be available in all areas.

**Plant for Performance and Grow with Confidence.**

**What makes biottrinsic™ different**

biottrinsic™ consists entirely of endophytes. This means that it lives inside the plant and works from within the plant tissues. It doesn't just live in the soil. biottrinsic™ delivers a range of benefits throughout the season:

- Helps mitigate drought and heat stress
- Greater efficiency of water use
- Nutrient use efficiency
- Supports conditions for root and plant growth

**From Plants for Plants**

biottrinsic™ comes from plants and is not discovered in a lab. It's an all naturally occurring microbe that has been extracted from plants thriving in stressful conditions. We isolate microbes that are abundant in plants that are thriving under stress while other plants around them are not. This allows us to tailor our products to a specific crop and set of stresses.

**Probiotics for Plants**

By using endophytes, the plants have naturally selected to incorporate these into their own tissue. We apply them at a high concentration to maximize the benefit.

**Drone imagery shows the significant NDVI increase of Indigo treated versus untreated cover crops**

Active Ingredients	Product	Pkg Treats	Pkgs/ Case	Case Size/Pail	Case Treats	Unit Measure	Application Rate	Shelf Stability	Planting Window
<i>Kosakonia cowanii</i> Min 1.0 × 10 <sup>7</sup> CFU/g	biottrinsic™ M36 FP	50 units	5	5x1x50	250 units	50 lbs	Cover Crops: 1.5 vol oz / CWT	12 months	15 days
		200 units	1	Pail	200 units	50 lbs			
		1000 units	1	Pail	1,000 units	50 lbs
