

Plant for Performance and Grow with Confidence.

**SATISFACTION  
GUARANTEE**  
100% with replant policy.

**Product Benefits**

biotrinsic™ W10 protects yield potential by:

- » Improving drought tolerance
- » Performs especially well in the Mid-South on medium CEC soils

biotrinsic™ X12 protects yield potential by:

- » Providing disease control of Fusarium and Rhizoctonia

**Drought Stress during flowering and grain fill:**  
*Data averaged over 2 years and 11 trials*

**How it works**

- » biotrinsic™ W10 improves root and plant growth supporting plant tolerance to drought.
- » biotrinsic™ X12 is a molecule produced by soil bacteria as a defense mechanism against fungi.
- » biotrinsic™ X12 is registered by the EPA.

Untreated      biotrinsic™

**Product details**

Active Ingredients	Product	Pkg Treats	Pkgs/Case	Case	Case Treats	Unit Measures	Application Rate	Shelf Stability	Planting Window
<i>Bacillus simplex</i> Min 1.0 × 10 <sup>7</sup> CFU/g + Natamycin 1.25 lbs/gal	biotrinsic™ W10 WP + biotrinsic™ X12 WD	200 units	1	1x200	200 units	50 lbs	Wheat and Other Cereals: 1.23 fl oz / CWT after dilution	12 months	>90days

A wide range of variables affect product performance, your results may vary. Product may not be available in all areas.

**Plant for Performance and Grow with Confidence.**

**What makes biottrinsic™ different**

biottrinsic™ consists entirely of endophytes. This means that it lives inside the plant and works from within the plant tissues. It doesn't just live in the soil. biottrinsic™ delivers a range of benefits throughout the season:

- Helps mitigate drought and heat stress
- Greater efficiency of water use
- Nutrient use efficiency
- Supports conditions for root and plant growth

**Probiotics for Plants**

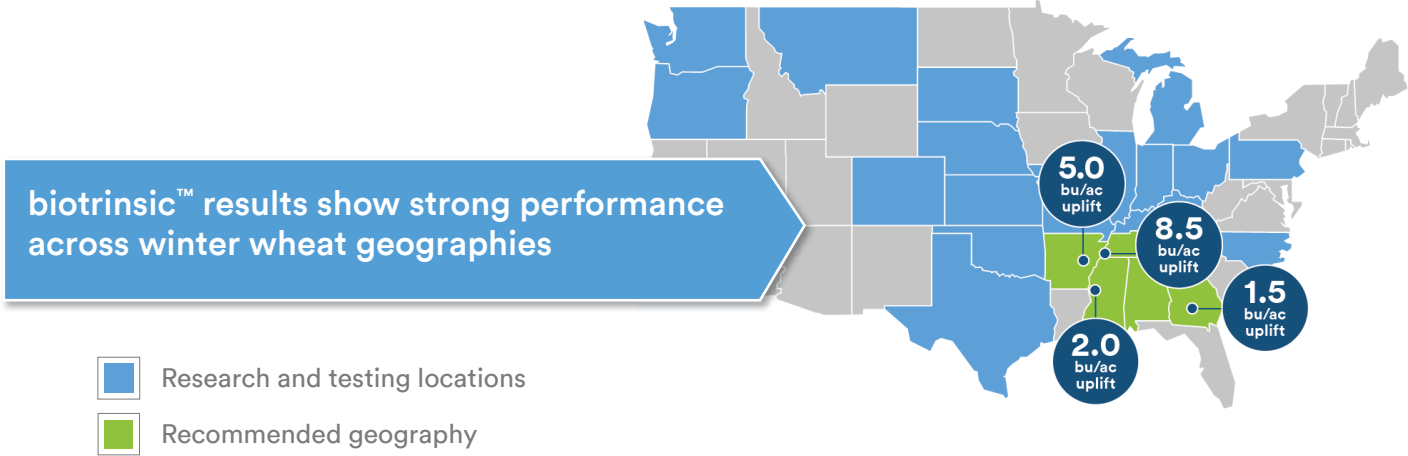

By using endophytes, the plants have naturally selected to incorporate these into their own tissue. We apply them at a high concentration to maximize the benefit.

**Biological Fungicide**

Seedling diseases in wheat can cause stand loss, yield loss, and grain quality issues. biottrinsic™ X12 WD is a biological fungicide that provides seedling disease control in wheat.

**From Plants for Plants**

biottrinsic™ comes from plants and is not discovered in a lab. It's an all naturally occurring microbe that has been extracted from plants thriving in stressful conditions. We isolate microbes that are abundant in plants that are thriving under stress while other plants around them are not. This allows us to tailor our products to a specific crop and set of stresses.
