

Indigo Ag US Project No. 1 (CAR1459)

Reporting Period 5

Issued 2026

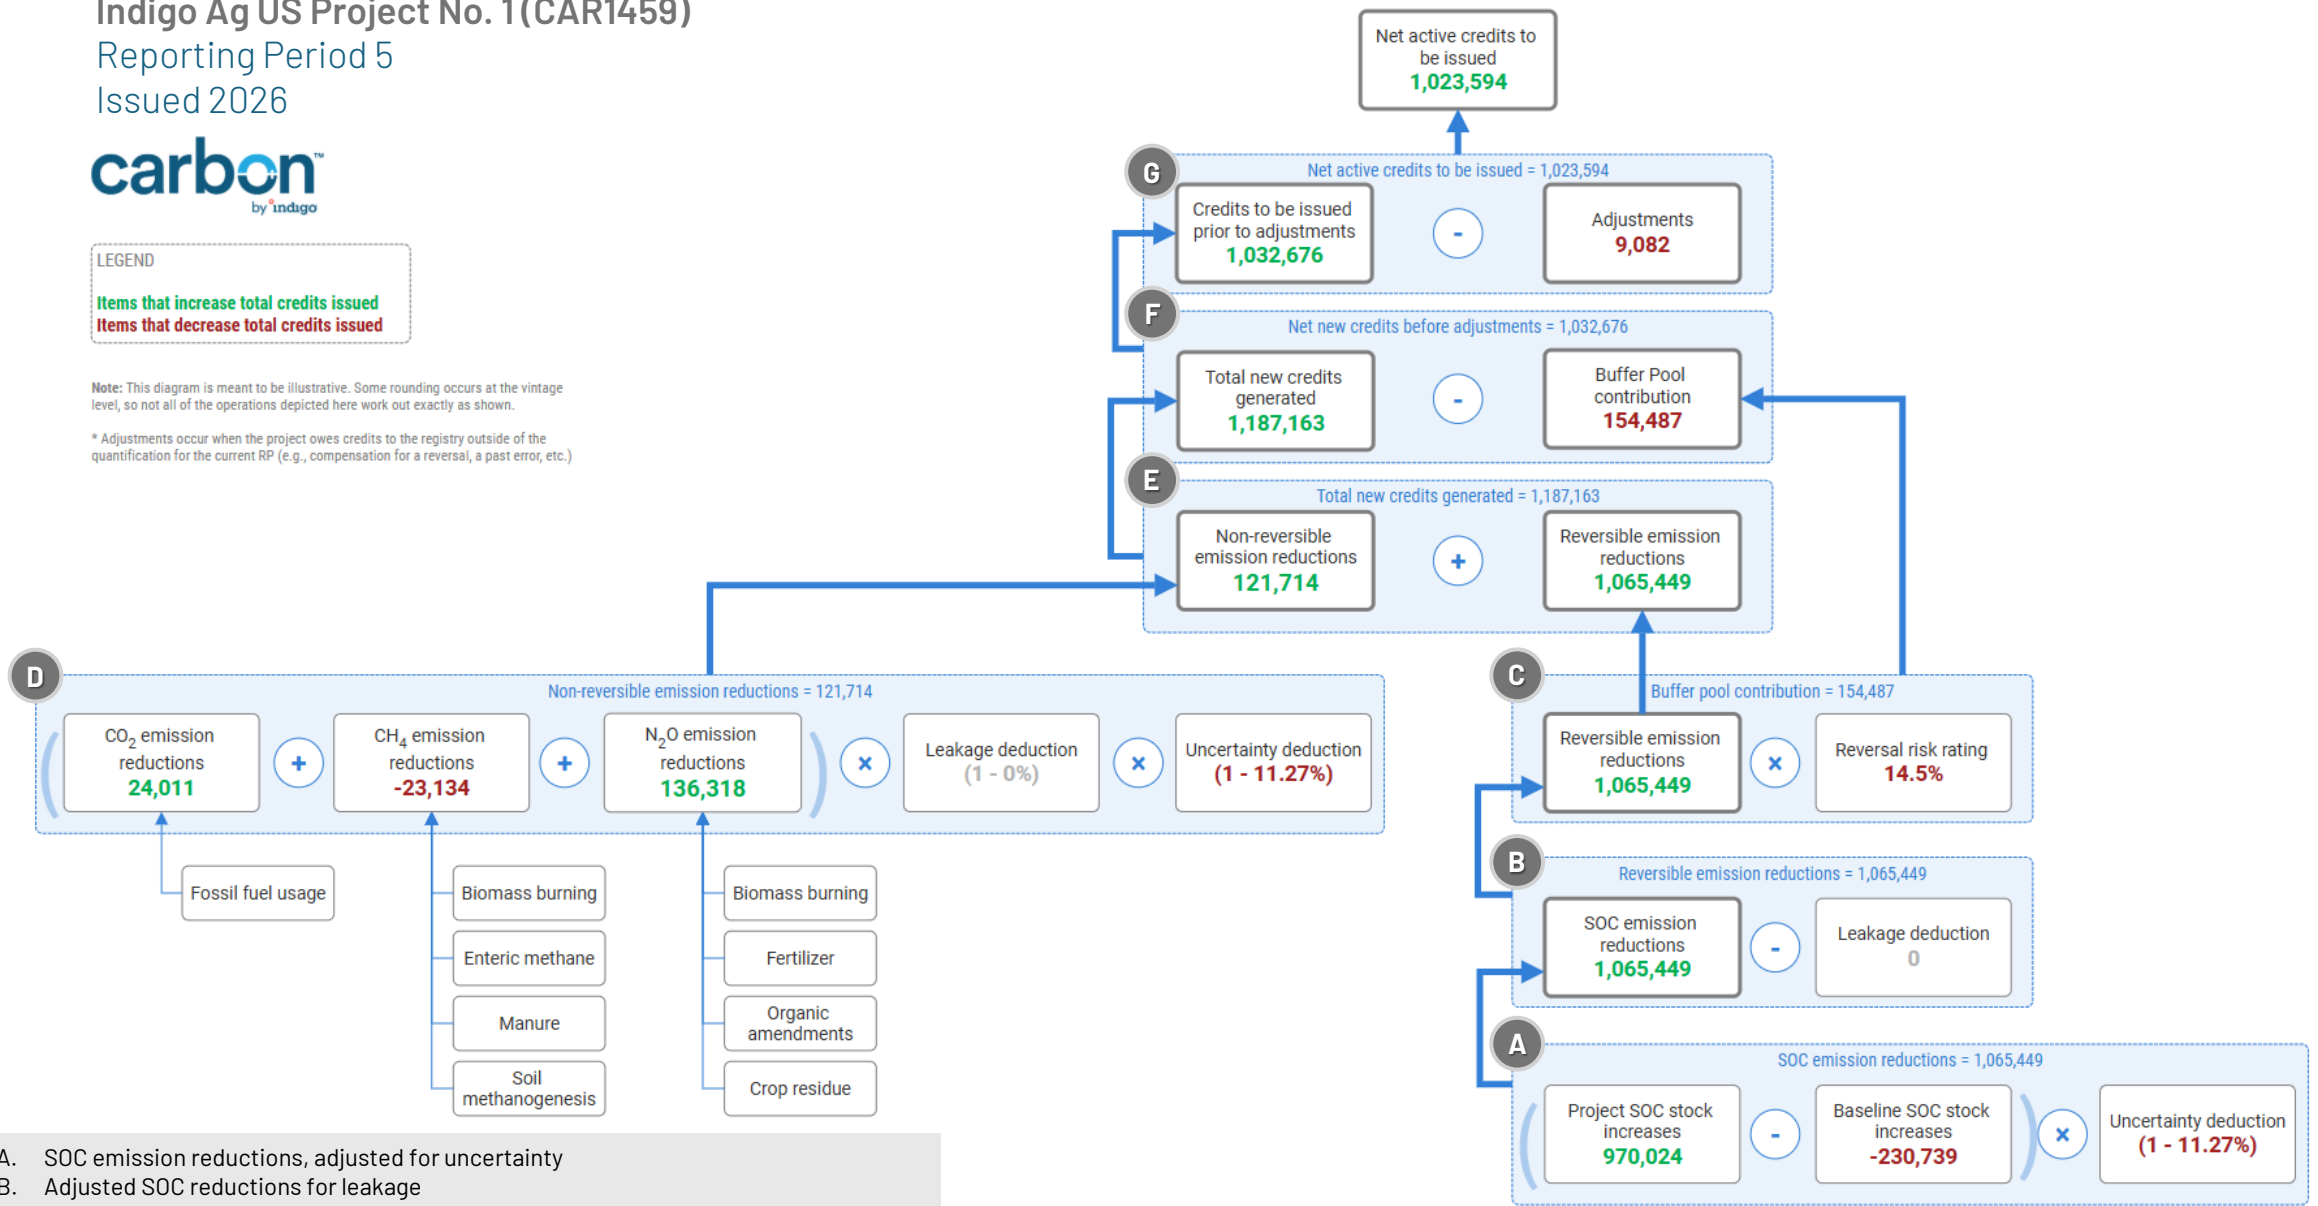

LEGEND

Items that increase total credits issued
Items that decrease total credits issued

Note: This diagram is meant to be illustrative. Some rounding occurs at the vintage level, so not all of the operations depicted here work out exactly as shown.

* Adjustments occur when the project owes credits to the registry outside of the quantification for the current RP (e.g., compensation for a reversal, a past error, etc.)

- A. SOC emission reductions, adjusted for uncertainty
- B. Adjusted SOC reductions for leakage
- C. Buffer Pool contribution calculation
- D. Non-reversible emissions reductions, post leakage and uncertainty
- E. Credits prior to final adjustments and buffer pool deduction
- F. Buffer pool deduction
- G. Additional adjustments (described in section 3.2 of CAR1459 Monitoring Report v5.8).

These data can also be found in the CAR1459 Monitoring Report v5.8, available for download from the Climate Action Reserve public registry.
