Indigo® microbial inoculant is a mixture of live microbes and an inert liquid. To maintain performance of live microbes, the product must be applied and stored as recommended.

Storage

- Store in a cool location away from direct sunlight below 75° F. DO NOT allow the Indigo® microbial inoculant to freeze.
- DO NOT open the package until it is ready to be used. If there is remaining product in the package, seal the package tightly and store as described above.
- Segregate from food and animal feed.
- Keep away from children.

Disposal

- Follow any and all local, state, and federal waste disposal guidelines for inoculants and plant amendments.
- DO NOT discharge into drains, surface water, or groundwater.
- For small releases, the product should be contained, swept up, and disposed of per local regulations for inoculants and plant amendments. For large releases, the product should be contained, collected via an appropriate method, and disposed of per local regulations for inoculants and plant amendments.

Seed Treatment Compatibility

Please consult with Indigo if there are questions on compatibility of specific chemical seed treatments, Indigo Supply Chain 901-250-5737. Indigo® products may not yet be registered in all states. Check with your Indigo representative for the registration status in your state. Information about this lot of microbial inoculant may be obtained by writing to Indigo Ag, Inc. 500 Rutherford Avenue, Charlestown, MA 02129 and giving the lot number which is found on the front panel of the product label.

Application Instructions

biottrinsic N13 WD + biottrinsic E13 WD is an all liquid system designed for use in a liquid tank mix in commercial seed treatment systems. For good seed coverage, Indigo generally recommends a minimum of 2.5 fluid oz. liquid slurry per 140k units of soybean seed, in any combination of non-chlorinated water and approved liquid seed treatments. Experienced seed treaters may choose to decrease the total volume applied.

- Prior to adding to the tank, shake well all components (biottrinsic N13 WD, biottrinsic E13 WD, and if applicable biottrinsic M34 WP).
- All components (biottrinsic N13 WD, biottrinsic E13 WD, and if applicable biottrinsic M34 WP) are to be used together.
- Gradually pour components into non-chlorinated water or approved liquid seed treatments.
- When all components are combined (biottrinsic N13 WD, biottrinsic E13 WD, and if applicable biottrinsic M34 WP), the mixture is ready to apply.

Tank Mix Time Restrictions

- To maintain inoculants viability, there is a maximum time all components can be kept in the mix tank:
- Inoculant alone or with non-chlorinated water should be applied to seed within 24 hours.
- With approved seed treatments, inoculant should be applied to seed within 4 hours.

Personal Protective Equipment (PPE)

Applicators and handlers are required to wear chemical-resistant gloves, safety glasses, and protective clothing.
